BMH Associates, Inc., a small, veteran-owned business headquartered in Norfolk, VA, is an Information Technologies Services company with a focus on distributed simulation technologies for training, exercises, and experimentation. The Company provides modeling and simulation software, interfaces between simulation and real world command and control systems, and hardware architecture and systems management oversight to military institutions through the U.S. Department of Defense (DoD).

BMH’s software/systems engineering activities are focused in the following areas:

- Distributed Simulation and C^4I Systems
- Computer Generated Force (CGF) Software Development
- High Level Architecture (HLA) and Distributed Interactive Simulation (DIS) Interface Development
- Distributed Simulation Exercise/ Experiment Integration and Execution
- Knowledge Acquisition/Engineering (KA/E)
- Verification and Validation (V&V)
- Military Staff Support
- Simulation Site Operation and Support

BMH maintains offices in Norfolk and Orlando, Florida. BMH also has employees located on-site at government facilities at the U.S. Joint Forces Command, Suffolk, VA; U.S. Marine Corps Base, Quantico, VA; and Navy Warfare Development Command, Newport, RI.

BMH is interested in personnel for full-time and intern positions. Interested parties should have (or in the case of Interns, be working toward) a Bachelors Degree in Computer Engineering or closely related field. The most desirable qualifications include Linux/UNIX application development experience; C and C++ development; and object oriented design and development knowledge. Also, experience in analyzing distributed applications’ run-time performance to include all layers of the protocol stack is a strong plus. Successful applicants have to be U.S. Citizens and have, or be able to obtain and maintain, a U.S. ‘Secret’ security clearance.
